CONTENTS

Number 1

J. Piper. Interaction forces between soil particles: shear moduli of the $<2\,\mu m$ size fraction 1

P. de Arambarri & O. Talibudeen. Changes in the mineralogy of a cultivated marsh soil caused by simulated weathering 13

G. J. Churchman & K. R. Tate. Stability of aggregates of different size grades in allophanic soils from volcanic ash in New Zealand 19

G. Y. Zhang, X. N. Zhang & T. R. Yu. Adsorption of sulphate and fluoride by variable charge soils 29

E. P. Manley, W. Chesworth & L. J. Evans. The solution chemistry of podzolic soils from the eastern Canadian shield: a thermodynamic interpretation of the mineral phases controlling soluble Al^{3+} and H_4SiO_4 39

I. K. Mitsios & D. L. Rowell. Plant uptake of exchangeable and non-exchangeable potassium. I. Measurement and modelling for onion roots in a Chalky Boulder Clay soil 53

I. K. Mitsios & D. L. Rowell. Plant uptake of exchangeable and non-exchangeable potassium. II. Influence of soil type on uptake by onion roots 65

M. B. Molope, I. C. Grieve & E. R. Page. Contributions by fungi and bacteria to aggregate stability of cultivated soils 71

L. A. Sullivan & A. J. Koppi. Torus-shaped pedological features associated with soil micro-organisms 79

W. A. Adams, M. I. Karim & S. N. Gafoor. Composition and properties of poorly ordered minerals in Welsh soils. I. Composition 85

W. A. Adams, S. N. Gafoor & M. I. Karim. Composition and properties of poorly ordered minerals in Welsh soils. II. Phosphate adsorption and reactivity towards NaF solution 95

J. L. Hutson & A. Cass. A retentivity function for use in soil–water simulation models 105

D. Ray, D. G. Pyatt & I. M. S. White. The effect of the frequency of sampling on the observed concentration of oxygen in an afforested peat soil 115

E. A. Matkin & P. Smart. A comparison of tests of soil structural stability 123

M. F. O'Sullivan, J. W. Dickson & D. J. Campbell. Interpretation and presentation of cone resistance data in tillage and traffic studies 137

N. J. Jarvis & P. B. Leeds-Harrison. Some problems associated with the use of the neutron probe in swelling/shrinking clay soils 149

Number 2

J. S. Dyson & R. E. White. A comparison of the convection–dispersion equation and transfer function model for predicting chloride leaching through an undisturbed, structured clay soil 157

J. A. King & K. A. Smith. Gaseous diffusion through peat 173

A. Hatton, J. Ranger, M. Robert, C. Nys & P. Bonnaud. Weathering of a mica introduced into four acidic forest soils 179

J. M. Bracewell & G. W. Robertson. Characteristics of soil organic matter in temperate soils by Curie-point pyrolysis-mass spectrometry. II. The effect of drainage and illuviation in B horizons 191

P. H. Le Mare, J. Pereira & W. J. Goedert. Effects of green manure on isotopically exchangeable phosphate in a dark-red latosol in Brazil 199

J. C. Ryden, J. K. Syers & R. W. Tillman. Inorganic anion sorption and interactions with phosphate sorption by hydrous ferric oxide gel 211

M. Jopony & S. D. Young. A constant potential titration method for studying the kinetics of Cu^{2+} desorption from soil and clay minerals 219

O. K. Borggaard. Influence of iron oxides on cobalt adsorption by soils 229

E. L. Meijer & P. Buurman. Salt effect in a multicomponent variable charge system: curve of zero salt effect, registered in a pH-stat 239

A. W. Bristow, J. C. Ryden & D. C. Whitehead. The fate at several time intervals of ^{15}N-labelled ammonium nitrate applied to an established grass sward 245

R. H. Qureshi & D. A. Jenkins. Concentration of phosphorus and sulphur at soil ped surfaces 255

K. W. M. Brown, J. H. Gauld, B. F. L. Smith, D. C. Bain, J. C. Burridge & R. H. E. Inkson. Design of a database for Scottish soils 267

M. A. Oliver & R. Webster. The elucidation of soil pattern in the Wyre Forest of the West Midlands, England. I. Multivariate distribution 279

M. A. Oliver & R. Webster. The elucidation of soil pattern in the Wyre Forest of the West Midlands, England. II. Spatial distribution 293

R. Evans & J. A. Catt. Causes of crop patterns in eastern England 309

G. M. Laslett, A. B. McBratney, P. J. Pahl & M. F. Hutchinson. Comparison of several spatial prediction methods for soil pH 325

A. J. Ringrose-Voase. A scheme for the quantitative description of soil macrostructure by image analysis 343

P. J. Loveland & B. Clayden. A hardpan podzol at Yarner Wood, Devon 357

G. Spoor & R. A. Ford. Mechanics of mole drainage channel deterioration 369

L. A. Sullivan & A. J. Koppi. Multi-orientation thin sectioning for the determination of 3-D morphology 383

Books on Soil Science Recently Received 387

Number 3

A. J. Koppi, J. O. Skjemstad, D. W. Page & D. J. H. Cockayne. Size and charge characteristics of kaolinitic soils in SE Queensland 395

K. P. Tomar. Chemistry of pedogenesis in Indo-Gangetic alluvial plains 405

B. M. Stewart. Ion chromatographic determination of nitrate in 2 M KCl soil extracts 415

F. C. Archer & I. H. Hodgson. Total and extractable trace element contents of soils in England and Wales 421

R. D. Teasdale. Copper-induced indefinite aggregation of humic substances: theoretical consequences for copper-binding behaviour 433

S. C. Jarvis. Laboratory studies of effects of lime on soluble Al, Ca, Mg and Mn in a pelostagnogley soil 443

N. J. Barrow. The effects of phosphate on zinc sorption of a soil 453

A. Bruand & R. Prost. Effect of water content on the fabric of a soil material: an experimental approach 461

I. Reid & R. J. Parkinson. Winter water regimes of clay soils 473

K. Gregson, D. J. Hector & M. McGowan. A one-parameter model for the soil water characteristic 483

N. J. Jarvis & P. B. Leeds-Harrison. Modelling water movement in drained clay soil. I. Description of the model, sample output and sensitivity analysis 487

N. J. Jarvis & P. B. Leeds-Harrison. Modelling water movement in drained clay soil. II. Application of the model in Evesham series clay soil 499

M. T. F. Wong, A. Wild & A. S. R. Juo. Retarded leaching of nitrate measured in monolith lysimeters in south-east Nigeria 511

D. Barraclough & M. J. Smith. The estimation of mineralization, immobilization and nitrification in nitrogen-15 field experiments using computer simulation 519

P. Colbourn & I. W. Harper. Denitrification in drained and undrained arable clay soil 531

L. R. Bakken, T. Børresen & A. Njøs. Effect of soil compaction by tractor traffic on soil structure, denitrification, and yield of wheat (*Triticum aestivum* L.) 541

Number 4

M. J. Kooistra, R. Miedema, J. H. M. Wosten, J. Versluis & J. Bouma. The effect of subsoil cracking on moisture deficits of Pleistocene and Holocene fluvial clay soils in the Netherlands 553

E. T. Eshett. The basaltic soils of SE Nigeria; properties, classification and constraints to productivity 565

E. Garcia-Rodeja, B. M. Silva & F. Macías. Andosols developed from non-volcanic materials in Galacia (NW of Spain) 573

A. R. Milnes & V. C. Farmer. Micromorphological and analytical studies of the fine matrix of an Australian humus iron podzol 593

R. R. Anand & R. J. Gilkes. Iron oxides in laterite soils from Western Australia 607

E. G. Youngs. Estimating hydraulic conductivity values from ring infiltrometer measurements 623

N. J. Jarvis, P. B. Leeds-Harrison & J. M. Dosser. The use of tension infiltrometers to assay routes and rates of infiltration in a clay soil 633

P. H. Nye & A. Y. Ameloko. Predicting the rate of dissolution of lime in soil 641

S. Staunton & P. H. Nye. The contribution of sorbed sodium and calcium to the self-diffusion of these cations in soils with different clay mineralogies 651

B. L. Williams, M. V. Cheshire & G. P. Srarling. Distribution of ^{14}C between particle size fractions and carbohydrates separated from a peat incubated with ^{14}C-glycine 659

Caroline M. Preston & M. Schnitzer. ^{13}C NMR of humic substances: pH and solvent effects 667

A. S. Black, R. R. Sherlock & N. P. Smith. Effect of timing of simulated rainfall on ammonia volatilization from urea, applied to soil of varying moisture content 679

R. B. Thompson, J. C. Ryden & D. R. Lockyer. Fate of nitrogen in cattle slurry following surface application or injection to grassland 689

A. M. T. Magalhães & P. M. Chalk. Factors affecting formation of methyl nitrite in soils 701

D. Curtin, J. K. Syers & G. W. Smillie. The importance of exchangeable cations and resin-sink characteristics in the release of soil phosphorus 711

Books on Soil Science Recently Received 717
